

## VitAmino<sup>®</sup>

Excellent choice for soil biochemical processes activation, improving mineralization of organic residuals, and improving mineral elements deposit bioavailability.

Packaging size: 1L, 20L, 1000L

## SaproGro<sup>®</sup>

To boost plant growth and enhance soil efficiency. Especially designed for use in both conventional and biological agriculture.

Packaging size: 40mL sachets, 1L, 20L, 1000L

## MicroGro<sup>®</sup>

To boost plant growth and enhance soil efficiency. Especially designed for use in 150 micron microjet application methods in both conventional and biological agriculture.

Packaging size: 40mL sachets, 1L, 20L, 1000L

## NanoGro<sup>®</sup>

To boost plant growth and enhance soil efficiency. Especially designed for use in 100 micron microjet and misting application methods in both conventional and biological agriculture.

Packaging size: 1L, 20L, 1000L

## HumiGro<sup>®</sup>

Our FRIABLE complex is especially blended with dark peat for use in agriculture and accelerated soil restoration and fertility activation.

Packaging size: 50L bags & 2500L bulk bags
